Get more from new SWIFT Share

OHLEG
OHIO LAW ENFORCEMENT GATEWAY

OHIO ATTORNEY GENERAL
BCI

> Through SWIFT Share, criminal investigative information can be securely shared among local law enforcement agencies in Ohio.

SWIFT Share:

- ✓ Can assist officers in making accurate and timely decisions.

- ✓ Is an additional data source in the Ohio Law Enforcement Gateway's search engine that provides a snapshot of another local agency's incident.

- ✓ Offers an environment for all agencies and their record management systems to participate.

OHLEG SWIFT RMS

When he took office, Ohio Attorney General Dave Yost made it priority to upgrade OHLEG to better serve agencies across the state, at no cost to them. The upgrade allows for easy electronic data export to OIBRS, DPS and SWIFT Share. Other features include:

Case Management

- Creation of cases from single or multiple linked reports
- Tracking of expenses, notes and case history
- Assignment of case tasks for follow-up
- Pictorial organization of relevant case data using link analysis diagram
- Ability to grant or revoke case access as needed
- Integrated Case Intelligence and Leads Tracking
- Private and confidential case options

Traffic Crash Report

- OH-1 Crash Report-compliant; electronic submission of crash data to the Department of Public Safety
- Intuitive user interface that displays only relevant fields
- Simple validation messages and error checking

Citations (contact us for electronic court submission options)

- Creation of e-citation or paper citation
- Tracking of paper citation distribution and inventory with void capability

Property Room

- Enhanced location maintenance for both temporary and permanent storage locations
- Complete chain of custody with signatures
- Ability to move groups of property from one location to another in a single transaction
- Ability to perform property audits using barcode scanning
- Ability to pre-log items directly from Property Room for submission to BCI Lab for testing

Incident

- OIBRS-compliant with built-in validations to notify user of errors during report entry
- Functionality to track changes across report versions
- Ability to link reports to an incident such as Field Interview, Crash or Intelligence Report
- Enhanced redaction capabilities to generate public reports
- Sealing and expungement capabilities
- Enhanced searching, reporting and notifications
