SOCIAL SECURITY NUMBERS

Notice required under Section 7(b) of the Federal Privacy Act of 1974

Under Section 7(b) of the Privacy Act of 1974, 5 U.S.C. §552a (note), any federal government agency which requests an individual to disclose his/her Social Security Account Number must inform that individual whether the disclosure is mandatory or voluntary, by what statutory or other authority such number is solicited, and what uses will be made of it.

Although not expressly bound by this provision, the Ohio Environmental Protection Agency and the Ohio Attorney General are authorized to request Social Security Numbers pursuant to Paragraph (D) of Section 3734.41 of the Revised Code, which defines the contents of disclosure statements. The Social Security number is used as a secondary identifier by the Ohio Bureau of Criminal Investigation when it conducts background investigations, when the Bureau of Criminal Investigation conduct checks of criminal history records maintained by the state and federal governments, and as a cross-check against motor vehicle records. In specific investigations which may involve examination of particular records obtained from outside sources, the Social Security number might be used to determine whether the individual named in the records and the individual under investigation are the same or different persons.

The listing of Social Security numbers on the disclosure forms is voluntary. The State of Ohio will not deny or revoke a license or impose any penalty because of an individual's refusal to disclose a Social Security Number. However, the absence of a Social Security Number as a secondary identifier may delay processing and decisions on licensure because of necessary additional investigative time. Further, a decision not to provide a Social Security Number may result in an individual initially being identified as having a criminal record, which actually is that of another person. This again, may result in delays in the decision on licensure required by Revised Code Section 3734.41 et seq.

APPENDIX B

REHABILITATION CRITERIA

Paragraph (C) of Section 3734.44 of the Ohio Revised Code provides for an exception to the disqualification that would otherwise result from a criminal conviction where the applicant affirmatively demonstrates rehabilitation of the individual or business concern by a preponderance of the evidence. If the convictions are felonies, a permit shall be denied unless, in the case of an individual, five (5) years have elapsed since the individual was fully discharged from imprisonment, probation, and parole for the offense.

The Director of the Ohio EPA or the Board of Health is required to request a recommendation from the Attorney General, and to consider the following factors when weighing the issue of rehabilitation:

1. The nature and responsibilities of the position which a convicted individual would hold.
2. The nature and seriousness of the offense.
3. The circumstances under which the offense occurred.
4. The date of the offense.
5. The age of the individual when the offense was committed.
6. Whether the offense was an isolated or repeated incident.
7. Any social conditions which may have contributed to the offense.
8. Any evidence of rehabilitation, including good conduct in prison or in the community, counseling or psychiatric treatment received, acquisition of additional academic or vocational schooling, successful participation in correctional work-release programs, or the recommendation of persons who have or have had the applicant under their supervision.

In the instance of an applicant that is a business concern, rehabilitation shall be established if the applicant has implemented formal management controls to minimize and prevent the occurrence of violations and activities that will or may result in permit or license denial or revocation or if the applicant has formalized such controls as a result of a revocation or denial of a permit or license. Such controls may include, without limitation, instituting environmental auditing programs to help ensure the adequacy of internal systems to achieve, maintain, and monitor compliance with applicable environmental laws and standards or instituting an antitrust compliance auditing program to help ensure full compliance with applicable antitrust laws. The business concern shall prove by a preponderance of the evidence that the management controls are effective in preventing the violations that are the subject of concern.
