

Ohio Attorney General's Office Bureau of Criminal Investigation Investigative Report

2025-3318

Officer Involved Critical Incident - 681 4th St. SW, Warren,
OH 44483, Trumbull County

Investigative Activity: Initial Crime Scene Processing
Involves: Warren Police Department
Activity Date: 10/12/2025
Activity Location: 600 block 4th Street. SW, Warren, Ohio
Authoring Agent: Special Agent Edward Lulla

Narrative:

On Sunday, October 12th, 2025, at 1130 hrs., Ohio BCI Special Agent (SA) Edward Lulla arrived in the 600 block of 4th Street SW, in Warren, Ohio regarding a request for crime scene assistance. There, SA Lulla contacted SA Larry Hootman, who had arrived earlier and was processing an additional scene several blocks away. It was decided that SA Lulla would process the 4th Street scene.

At this time SA Lulla contacted and was briefed by SA John Saraya of the Force Investigative Unit who was already at the scene.

According to SA Saraya, earlier in the day Brad M. Bailey (C/M 12/22/83) was involved in a domestic dispute. Prior to fleeing that scene, Bailey had threatened law enforcement and threatened to commit suicide by cop. Later in the day, law enforcement observed Bailey's vehicle at which time a pursuit ensued until Bailey's tires were disabled. Bailey reportedly exited his vehicle while holding a firearm and began to flee on foot. At one point Bailey allegedly approached a Warren police cruiser and used the firearm to hit the police cruiser. Agent Lulla was told that at this time, pursuing officers fired at Bailey, striking him. Agent Lulla was told Bailey was transported from the scene and upon arriving at a local hospital that Bailey was declared dead. It was reported no officers were reported to have been injured as a result of this incident.

At this time, SA Lulla collected photographic documentation of the 4th Street scene as it was found upon his arrival. The scene was later documented by SA Hootman using a Leica BLK360 laser scanner. Both the photographs and scanned data will be downloaded into the Axon Evidence.com database.
