Bureau of Criminal Investigation
Investigative Report**

2024-3257

Officer Involved Critical Incident - 200 Cline Avenue,
Mansfield, Ohio 44907

Investigative Activity: Records Received and Reviewed; Mansfield Police
Department Crime Scene Log and ShotSpotter Report

Involves: Mansfield Police Department (O)

Activity Date: 12/06/2024

Activity Location: 4055 Highlander Parkway, Richfield, Ohio 44286

Authoring Agent: SA Andrew J. Harasimchuk #170

Narrative:

On Friday, December 06, 2024, Ohio Bureau of Criminal Investigation (BCI) Special Agent (SA) Andrew Harasimchuk (SA Harasimchuk) reviewed documents from Mansfield Police Department (MPD). The records which were requested included any reports pertaining to the October 19, 2024, officer-involved critical incident, except for any statements made by the involved officers. SA Harasimchuk received the following documents:

- Mansfield Police Department Crime Scene Log

The crime scene log was added as Attachment #1 to this report. Refer to Attachment #1 for further details.

- The ShotSpotter Investigative Lead Summary report

INDIVIDUAL SHOTS

The following shot count, times, and locations were automatically calculated by the ShotSpotter system at the time of detection. They are approximate and should be deemed as such. The number of individual shots below may not match the round count reported on page one if an Incident Reviewer adjusted the round count during incident review prior to publication. Some shots may overlap or hide other shots on the map

SHOT	DATE	TIME	INTERVAL(SEC)	LOCATION

DISCLAIMER

The Investigative Lead Summary is produced using data automatically generated by the ShotSpotter system and has not been independently reviewed by ShotSpotter forensic personnel. Although it provides precise trigger-pull location and timing as determined automatically by the ShotSpotter system, this summary should be used primarily for initial investigative purposes because the shot timing, location, and count could differ once reviewed by forensic personnel. Factors, such as obstructed or attenuated muzzle blast, weapon discharge in an enclosed space, or if the weapon discharged is of .25 or smaller caliber, may prevent the sensor(s) from detecting all or some of the shots fired. This summary has been generated solely for the purpose for which it is provided. Nothing herein shall to any extent substitute for the independent investigation of the shooting incident. The data and conclusions herein should be corroborated with other evidentiary sources such as recovered shell casings and witness statements.
