

The point in 911-2 when the recording sounds doubled is when Sgt. Long Picked up his phone to monitor the call. This occurred at approximately 0153 on the 911-2 recording. If you listen to the Sgts line recording and set the speed to 2.0 x it sounds normal. Nothing I could do would prevent the feedback(?) on the 911-2 recording. The Sgts Line recording starts at 0153 on the 911-2 recording.
