Manchester, OH 45144 (L)

Investigative Activity: Digital Extraction/Parsing
Date of Activity: 11/25/2025
Author: Ryan Pacala

Summary

On 11/19/2025, the Ohio Bureau of Criminal Investigation's (BCI) Cyber Crimes Unit (CCU) was requested by the Adams County Sheriff's Office and the BCI Force Investigations Unit (FIU) to assist in the investigation of an Officer Involved Critical Incident, pursuant to a Search Warrant.

Submitted Items:

001 CCU# 6 CSU# – DVR – Black CCTV Security Pros CSP-16PRO-4KX

Details

The 1TB Seagate SkyHawk (ST1000VX005) (S/N: Z9C6XB5Y) hard drive from the CCTV Security Pros (CSP-16PRO-4KX) DVR was connected to a CCU forensic computer with a write blocker attached and a forensic duplicate image was performed with X-Ways Forensics. The image was verified through hash algorithms and the results noted in the imaging log file. The image was processed with Magnet Witness, a software package that converts data to an easily readable format. The DVR was powered on without the hard drive attached so the date and time could be verified.

A screenshot of the DVR time was received from BCI Special Agent Chadwick Holcomb. The time on the DVR displayed "11-15-2025 02:17:25". The screenshot also displayed the metadata from the photo, which showed the date and time of 11-15-2025 01:17AM. The screenshot showed that the DVR time was one hour faster than the actual time. The DVR was powered on in the CCU lab and appears to not keep time once it's unplugged.

There were 8,174 video clips parsed from the 1TB Seagate SkyHawk hard drive with the Magnet Witness software. The video clips between 11-14-2025 00:00:00 and 11-14-2025 18:00:00 were exported and provided for review.

Conclusions

Data was extracted from the 1TB Seagate SkyHawk hard drive from the CCTV Security Pros DVR.
