

**Ohio Attorney General's Office
Bureau of Criminal Investigation
Investigative Report**

2024-1218

Officer Involved Critical Incident - 1822 Sherrick Road SE,
Canton, OH 44707

Investigative Activity: BCI Laboratory report received - Chemistry
Involves: Frank Tyson (S)
Activity Date: 04/26/2024
Activity Location: BCI Richfield
Authoring Agent: SA Jon Lieber #50

Narrative:

On Friday, April 26, 2024, Ohio Bureau of Criminal Investigation (BCI) Special Agent (SA) Jon Lieber (Lieber) received Ohio BCI Laboratory report(s) for items of evidence submitted on April 22, 2024 for scientific analysis (laboratory case number 24-32927). The report originated from the Chemistry section of the laboratory and was authored by Forensic Scientist Lydia T. Lee. The items relevant to this report which had previously been submitted were as follows:

1. One (1) knotted plastic bag containing unknown off-white substance (Matrix item #001, Lab item #1)

SA Lieber reviewed the laboratory report and noted the following:

The unknown off-white substance was found to contain cocaine. This determination was made using chemical testing and instrumental analysis.

A copy of the Ohio BCI Laboratory report is attached to this investigative report. Please refer to the attachment for further details.

Lab Case: 24-32927
Agency Case: 2024-1218

Analytical findings offered above were determined using macroscopic examination and other accepted forensic drug chemistry methods. Where applicable, an estimate to the measurement uncertainty associated with the weight of an item has been provided. The coverage probability in such instances is 95.45% (k=2).

Based on scientific analyses performed, this report contains opinions and interpretations by the analyst whose signature appears above. Examination documentation and any demonstrative data supporting laboratory conclusions are maintained by BCI and will be made available for review upon request.
