There is only one thing I truly desire not to sabotage, that is my princess in shining armor.

I can no longer overcome this pain in my chest, I'm tired of relying on drugs and alcohol to function and/or not feel pain. Tonight I complete this project. My childhood dream of a princess in shining armor, one of which she (her person/who she is) saves me will be necessary no more.

As difficult as this is for either of us to believe, I think we each must admit, for the pieces to come together this perfectly, there had to be an outside force. Can we each accept our forever forever as commitment is something we understand well.

When my princesses Father was at the start of his journey, just after receiving his van, to eventually become the greatest dad in history, he somehow appeared to me. He was looking for assistance to become a guitarist, I listened and the song really sucked but I didn't say it. He really wanted a daughter and I gave him confirmation that he was going to get exactly what he hoped for. We could have been best friends, I hugged him many times because I knew that when I would meet that daughter he would not be present. My princess and I were chosen by God to begin a world that knows Love. She will lead and I will support, as my life has been a war since it's inception and I am in need of rest. If my princess would join me for new years I would love to give every detail of my short encounter with her father.

Sure Hi I just saw this message and spoke to Christina. My sleep schedule is off so I didnt get back to anyone til now.

Let me know when you adjust Christina's heater because I have a usb fan. But i found kinetic fans and wanted your opinion on which one to get or where to put it?

There's one on sale for \$10 and I might just get it but there are other options. Check it out!

I would put the kinetic fan at the base of the heater right next to the thermostat. That is a fantastic idea.

I look at my phone in periods so my response is slow, but in my opinion is healthier. I just happened to be here for your text. I'm mostly a by appointment person, it helps with the creative thinking.

But the fan is great, I'm going to pick one up to toy with myself. Kinetic energy transfer has been interest of mine for a while, but I never had time to toy with things before like I do now.

For one to be most efficient, I need to really consider the bearing size. That will take some research.

Im not surprised your neighbor complained about bubbles. An old man was targeted for feeding his pet squirrel in his own backyard. And he rescued it and raised it. Bubble machines and cars is actually not a bad idea

All I was trying to do is follow up with our conversation yesterday, that I would like for you to ask the family to see if it would be okay if I could meet this woman. But if you feel uncomfortable that is okay.

Very good to know. Would you happen to have a spare parts kit from other projects? There was a hole in the box and I'm concerned a couple bolts maybe missing. I intended to do an inventory to be sure soon.

Make sure you have your own form of transportation to come and go from here. It might be a good idea to learn the bus system. It's much cheaper and save you money.

Yes or no question, something that is currently taking up a lot of space in my mind. A company is trying to say there was a problem with my payment made about 30 days ago and trying to collect money after I already received the product. From a business side, I believe this should be utilized as the cost of doing business so they learn better procedure, from the human side, I want to show there are honest responsible people and just pay them.
