Narrative:

During the course of this investigation, Ohio Bureau of Criminal Investigation (BCI) Special Agents obtained video footage relevant to the Officer Involved Critical Incident (OICI) that occurred in Warren, Ohio, on October 12, 2025. The OICI involved Trumbull County Sheriff's Office (TCSO) Deputies, Champion Township Police Department (CTPD) Officers, and Warren Police Department (WPD) Officers. TCSO, at the time of the OICI, did not have department issued Body Worn Cameras (BWC) or in-car dash cameras. CTPD involved officers were equipped with BWC's, and WPD involved officers were equipped with BWC's and in-car cameras. All video footage relative to the OICI was obtained from both CTPD and WPD and were uploaded to Axon Evidence located in folder **Reference Item E - Videos**.

During a neighborhood canvass that was conducted in the area of the OICI on the date of the incident, agents obtained Wyze home surveillance footage from 689 Fifth Street Southwest resident Britney Spencer (Spencer). Special Agent (SA) Joseph Lamping reviewed the surveillance footage and detailed his findings in his authored report titled **2025-10-12: Neighborhood Canvass and Interviews**. SA Lamping also uploaded the home surveillance video footage to Axon Evidence for review, located in folder **Reference Item E - Videos>689 Fifth Street Video>Home Surveillance Video - 689 5th Street**.

This report serves as a comprehensive review of the video footage obtained from CTPD and WPD and contains information from those obtained videos that the authoring agent felt were relevant to this investigation. *For a full understanding of the events of the OICI, it is recommended that the reader review the video files in their entirety.*

ADDITIONAL FACTORS FOR EVALUATING THE VIDEO RECORDINGS

There are numerous other factors that need to be considered when reviewing and evaluating the videos and audio recordings of this incident. Those factors are:

A. Video recording devices record within the video and sound capabilities available, and they record objectively. Video recordings lack the history, perspective, and interest of the people involved. The positions, angles, obstacles, lighting, and distance from the incident are also factors that need serious consideration.

B. Video recording devices also record more information about a particular scene or incident than the person(s) involved in the incident can process during the critical incident. Video recording devices rarely record an event from the same perspective of the officer. It captures the action but not the perception, decision making, focus, or intent of the officer. Video recordings often miss tactile cues or other actions of a subject.

C. The speed of the incident is remarkable. The speed and complexity of rapidly evolving situation(s) that occur during use of force encounters are difficult concepts to comprehend by only watching the video.

Comprehensive BWC and Dash Camera Footage Review

- 06:58 Hours (No time stamp on video): [REDACTED] Dash Cam Unit [REDACTED]; As Brad ran towards the WPD cruiser, a black item believed by officers to be a black handgun is visible (T: 02:50). Below is a photo of the black handgun in Brad's right hand as Brad was running from pursuing officers and into the WPD cruiser approaching him. The following photo is a zoomed in screenshot, offering a closer view of the black handgun in Brad's right hand. Due to the quality limitations of the recording device, the detail of the firearm is diminished but is discernable as a black handgun by the manner in which Brad is handling the firearm. The third photo below depicts Brad just prior to making physical contact with the WPD cruiser, and the, believed to be black, firearm is identifiable.

Brad immediately pointed the believed black firearm still in his right hand at ██████████, and ██████████ immediately raised his left arm in an attempt to shield himself from being struck by gunfire he believed was imminent from Brad (T: 02:20). - 06:58:24 Hours: ██████████ BWC 2076891-0; Brad Bailey is seen again clearly pointing the black handgun directly at ██████████ seated in the WPD cruiser driver's seat (T: 02:21) for a second time. The barrel of the black handgun is visible. Even though the black handgun Brad possessed and pointed at ██████████ ██████████, was later found to be a true replica handgun, a reasonable officer in this quickly escalating incident would not be able to make that distinction. Brad then looked in the direction of the pursuing officers him on foot and began to strike ██████████ ██████████ closed driver's window with the black handgun four times, and each time Brad struck the driver's window it was apparent from the video reviewed that the black handgun was separating from the force of striking the window. Brad also appears on the video to be under the influence of some intoxicant based on his facial expressions and characteristics observed during this time. Below are three screen captures relative to the information above.

General notes from the review: All the involved officers, including officers that did not fire their firearms, appeared to be shaken after the OICI occurred. At least one officer appeared to experience dry heaving. Other officers appeared to be visibly shaken and possibly experiencing the effects of an adrenaline dump well after the event. Some of the officers involved questioned other officers present if they were struck by gunfire and expressed fear that they were going to be shot by Brad during the incident. The officers checked each other to see if they were struck by gunfire would lead a reasonable officer to believe that Brad may have fired his black handgun at officers. Shortly after the OICI occurred, and life saving measures were administered to Brad Bailey, the involved officers were separated prior to their perspective BWC's being deactivated.

At no time during the video reviewed did Brad appear to obey any commands given to stop or show his hands.

This concludes the comprehensive review of the obtained dash cam and body worn camera video footage.
