**Narrative:**

On Tuesday, March 21, 2023, the Trumbull County Sheriff's Office (TCSO) requested Bureau of Criminal Investigation (BCI) assistance at the scene of an officer-involved shooting at 1433 State Route 7, Brookfield Township, Ohio. As part of that investigation, Special Agent (SA) Joseph Goudy (Goudy) and BCI Crime Scene Technician (Tech) Mike Rostocil (Rostocil) were requested to attend the post mortem examination of the decedent, Fred Henry Wild III. The examination was conducted on March 22, 2023, at the Trumbull Regional Medical Center by the Trumbull County Coroner's Office in Warren, Ohio. The post mortem examination was conducted by Dr. Stervens.

The following observations were made during the course of the autopsy:

There appeared to be five entry wounds; two in the left arm, one in the head, one in the neck and one in the flank (torso). Dr. Stervens pointed out stippling around the entry wound on the back of the head. The two rounds that struck the left arm appeared to severely fracture and/or break the bone. During the course of the autopsy, Dr. Stervens removed metal fragments from the brain and skull area. There was one entry hole towards the back of the skull and no exit wound. In addition, Dr. Stervens also removed metal fragments from the back of the neck and upper back area.

SA Goudy requested to receive a copy of the full autopsy and toxicology reports once available.

As a result of the autopsy, the following items of evidence were collected and transferred to the custody of SA Goudy:

1. One pair of boots
2. One tan T-Shirt
3. One blue pajama pant
4. Scalp hair – from the back of the head
5. Metal fragments from clothing
6. Cut fingernails – left hand
7. Cut fingernails – right hand
