Author Assignment 1
Narrative Text Dispatch: Apparatus was dispatched for a tractor on fire.

Responding: While enroute, we were advised that there was a farm tractor on fire.

Resources: Initial dispatch was for a vehicle fire. WCCC automatically dispatched one additional engine.

Size up: E23 arrived on scene to find a farm tractor on fire with no exposures.

360 Report: The tractor was not near anything and appeared stable, so no additional size up was needed.

Assignment: E23 established command and pulled one hand line to extinguish the fire.

Conditions: The fire was in the engine compartment of the tractor.

Actions: E23 extinguished the fire with one hand line and tank water. They advised the fire was out and for E22 crew to assist with finishing up.

Needs: No additional needs.

Termination: Crews picked up the hose and tools and then command was terminated and TAC channel was released.

Investigation: The owner of the property stated he mowed a field this morning. After he finished, he parked the tractor near the field. He stated the tractor was not running and he saw smoke coming from out of the engine area. He went over to check it out, and then he called the FD. He stated there has been issues with birds building nests in the engine area of his equipment a number of times in the past, so he thought this could have been a possible cause of the fire. Pictures of the tractor were taken. Tractor model: John Deere JD-6145R, Serial #: 1RW6145RPGR025335. KC
